112 All Black Street, Anderbolt, Boksburg, Gauteng, South Africa.

6th November 2017

I am Evan Peters the managing member of Jadec Conveyor Systems.
We have been dealing with AM Systems since 2015, we were looking for a systems integration company to provide a turnkey conveyor automation solution.

We have been dealing with smaller (one man band) contractors in the past, the size of projects we have been getting started exceeding their capacity.

Michael and his team from AM Systems have proven themselves to be a solid provider of know how, hardware and services They provide the full service from consultation, quotation, panel design, panel building, site installation, field installation, PLC programming, HMI programming, Scada programming to commissioning...

Of all the supply and services provided by AM Systems, the one we value the most is the dedication and commitment from the AM Systems team.

Countless late nights ranging from midnight to 03h30 in the morning to ensure a project is finished so that the customer (end user) is not disappointed .

AM Systems provide great quality hardware and workmanship at "Value For Money" prices.

I have no hesitation recommending AM Systems to any company requiring a one stop turnkey automation solution.

Looking forward to your reply

Kind Regards

Evan Peters
